Testing of power distribution transformers Distribution and Power Transformers. Fri, 13 Apr 2018 07:35:00 GMT Distribution Transformers - Cooper Industries - Design The main considerations taking into account during the design process are: 1. Reliability without excessive cost) 3. Expansion of the station, if required. Selection of the location of a substation must consider many factors: 1. Sufficient land area 2. Necessary clearances for electrical safety 3.
